

A Medical Branch with several Medical Groups may be established for large incidents or incidents at multiple sites. Overall command of EMS field operations in a full Branch response is delegated to the Multi-Casualty Branch Director. The Medical Group Supervisor or Multi-Casualty Branch Director will report to the IC or the Operations Chief if an Operations Section is activated.

Section 3.3 Initial Set Up of the Medical Group

3.3.1 First On-Scene

The **First on-Scene EMS unit's paramedics (or EMTs)** will report to the Incident Commander or Operations Chief. The First on-Scene EMS unit paramedic #1 (or EMT #1) will function as the Medical Group Supervisor until an EMS Officer arrives to assume the Medical Group Supervisor role. Paramedic #2 (or EMT #2) will be the Triage Unit Leader until relieved.

First on-Scene EMS units will do the initial medical assessment ("windshield assessment") of the scene to establish:

- Type of incident (trauma, medical, Hazmat or combination),
- Incident location and best ingress routes for ambulances.
- Estimated number of victims, and
- If additional response EMS resources are needed.

The assessment is communicated back to DEC who relays it to all responding agencies.

The **First on-Scene EMS Field Supervisory staff** duties include:

- Report to Incident Commander. Usual work site is at the Command Post with the Incident Commander.
- Receive Situation Report (Sit Rep) from Incident Commander and interim paramedic (or EMT) Medical Group Supervisor.
- Assume the role of Medical Group Supervisor.
- Set up the Medical Group or Branch. On large incidents, designate the paramedic or EMT who served as interim Medical Group Supervisor as an "Assistant. Medical Group Supervisor" who will assist with radios and incident management.
- Repeat the medical assessment of incident and work with Incident Commander to request additional resources and personnel if needed for triage and litter teams or patient transport.
- The Medical Group Supervisor monitors/utilizes the Tactical Channel to talk to Incident Commander and Medical Group Channel to talk to Medical Officers.
- If delegated by Incident Commander, Medical Group Supervisor will assume task of giving updates and requesting additional medical resources through DEC.

3.3.2 Second, Third and Subsequent On-Scene

Second on-Scene EMS units will report to Incident Commander or Medical Group Supervisor as directed. The Second-In Unit Paramedic (or EMT) #1 will be the Treatment Unit Leader and Paramedic (or EMT) # 2 will be the Transport Unit Leader until relieved by an EMS Officer. The Second EMS Field Staff On-Scene duties include:

- Report to Medical Group Supervisor to receive a Situation Report.
- 2nd EMS Field Supervisory Staff will normally be assigned the Transport Leader role.
- Utilize secondary Medical Channel (or cell phone) to talk to DEC to distribute patients to hospitals throughout City.
- The Incident Commander and / or Medical Group Supervisor can special call additional EMS Field Supervisory Staff to the scene, if required.

The **Third EMS Field Supervisory Staff On-Scene** duties include:

- Report to Medical Group Supervisor to receive a Situation Report.
- Determine if a Medical Branch with several Medical Groups will be established. Consult with Incident Commander who will make the final determination on the organization of the field medical response.
- 3rd EMS Field Supervisory Staff may serve as Medical Branch director, if established, or as an additional Medical Group Supervisor, or support Medical Group Supervisor, or Triage, Treatment or Transport Officers as directed by the MGS. Medical Branch Director or Medical Group Supervisor should be staffed with an experienced supervisor.

Subsequent ambulances will report to the Medical Group Supervisor who will direct the crews to the Treatment Area for staffing the Immediate, Delayed and Minor Treatment Areas.

Section 3.4 Alert Level Determination

The Incident Commander determines the appropriate alert levels based on the number of victims and if outside resources are needed to manage the incident. The lowest alert level to adequately meet the situational demands should be used.

A single alert level is issued for every incident. The alert level may be upgraded or downgraded at any time during the incident based on the direction of Incident Commander. It is important to note that the cut off points for the number of victims needed to call a Level 1, 2 or 3 MCI alert are flexible. For example, 30 pediatric trauma victims may require sending some of the victims to out-of-county destinations – a Level 2 MCI alert.
