

Other available options for in-county resources include the caches that each medical-health provider maintains. This may be the best available option if your resource need is very limited or if there are medical specialty items that may only be immediately available through another medical provider (e.g. special surgical instruments, etc.). Requests to access provider caches must go through an individual provider's leadership or, if activated, their disaster command center.

Section 3.18 Initiating Medical Mutual Aid

3.18.1 The Use of Medical Mutual Aid

Medical mutual aid is driven by patient medical needs. Therefore, medical mutual aid may be used in more situations than non-medical mutual aid. These situations may include:

- When the surging of medical resources within San Francisco has been exhausted due to overwhelming patient demand.
- For medical resources that have a limited supply in San Francisco. For example, limited supplies of trauma center beds for critical trauma patients or burn care beds for severely burned patients may necessitate sending patients to out of county facilities even though the total number of patients resulting from a particular incident is low.
- When it is determined that patients may receive treatment faster if they are sent to out-of-county facilities using the Mutual Aid process rather than "surging" in-county assets. For example, San Francisco has disaster medical field care clinics that may take several hours to set up, supply and staff whereas sending patients to out-of-county facilities may take less than one hour.

Many medical assets are available within San Francisco and should be accessed first before requesting Mutual Aid, unless it has been determined by direct patient care providers (field or hospital) that out-of-county assets may provide a better patient outcome.

3.18.2 Initiating a Medical Mutual Aid Request for Resources into San Francisco

The Incident Commander (IC), the DEC, any hospital or medical facility, DPH or other city agency may initiate a medical mutual aid resource request by notifying the following:

- DEM Duty Officer if the EOC is not activated. The DEM Duty Officer may be contacted 24/7 through the DEC. The DEM Duty Officer will contact the MHOAC.
- EOC's Public Health & Medical Services Group, if activated, will contact the MHOAC.

All requests for Health and Medical mutual aid resources into the San Francisco Operational Area shall be authorized and coordinated through the MHOAC or his/her designee. The MHOAC or EOC's Public Health & Medical Services Group (if activated) shall complete the mutual aid resource request using the California Disaster Health Operations Manual process and templates. The California Emergency Management Agency (CalEMA) will assign a Mission Number once the request is entered into the Regional Information Management System (RIMS).

The MHOAC or designee may also request EOC or DOC activations to assist in supporting the receipt of out-of-county mutual aid assets. The MHOAC and / or EOC's Public Health & Medical Services Group will advise city leadership about any medical mutual requests.

3.18.3 Providing Medical Mutual Aid Resource to Other Counties

1. Requests originating through the **Fire Mutual Aid System** for SFFD ambulances will be approved through SFFD in consultation with the MHOAC.
2. Requests originating through the **Medical Mutual Aid System** are authorized and coordinated through the MHOAC or his/her designee. The Region 2 RDMHC will contact the MHOAC to make a request. The MHOAC or designee will take the mutual aid request information and contact the appropriate city agency or medical-health facility to fulfill the request. The MHOAC may elect to coordinate the sending of mutual aid assets to the out-of-county destinations, or delegate that task to the agency fulfilling the request or request EOC and/or DOC activations to supporting the sending of San Francisco mutual aid assets to out-of-county destinations.

3.18.4 Resource Request Tracking and Fulfillment

The RDMHC and the MHOAC will advise each other when a resource request(s) has been fulfilled, whether any changes in quantity or substitutions were necessary, its projected delivery time, or if the request was cancelled. The MHOAC may task the EOC Logistic Section with tracking the status of the resource request.

Section 3.19 Ambulance Strike Teams

Ambulance Strike Teams from other counties may be requested through mutual aid. In California, the standard Ambulance Strike Team consist of five ambulances (ambulance with two personnel) with common communications and a leader and are typed according to FEMA typing for medical and health resources. Each may include a Disaster Medical Support Unit or comparable local support unit to serve as an operational command, control, and communications center.
