

**SPOKANE COUNTY
FIELD OPERATIONS GUIDE
and
SPOKANE COUNTY FIRE
RESOURCE PLAN**

**Inland Empire Fire Chief's Association
Inland Northwest Law Enforcement Leadership
Group**

PREFACE

This Field Operations Guide (FOG) was created to assist emergency response agencies of Spokane County and the greater Inland Empire in the art of incident management. It is intended to serve these agencies by promoting a common all-risk Incident Command System (ICS). This document provides an incident management framework to meet an agency's routine ICS needs as well as expanding to meet the demands of large-scale complex events, which by their nature, demand safe, effective incident management and multi-agency coordination.

The Inland Empire Fire Chief's Association and the Inland Northwest Law Enforcement Leadership Group encourages agencies to utilize this guide as a baseline for managing incident operations recognizing it may need to be supported by additional agency specific policies and guidelines. The Spokane County ICS Field Operations Guide is compatible with and used in conjunction with the Spokane Area Fire Resource Plan, the Washington Fire Mobilization Plan and the Northwest Regional Law Enforcement Mobilization Plan to order and coordinate the use of incident resources.

This document should be seen as a "work in progress" and as such will demand periodic review by the Inland Empire Fire Chief's Association and the Inland Northwest Law Enforcement Leadership Group.

Adopted:

Inland Empire Fire Chief's Association
Inland Northwest Law Enforcement Leadership Group
