

CANCELLATION/SLOW DOWN

It is recognized that it is in the best interest of patient care and public safety to slow or cancel units responding in the emergency mode to calls when it is determined that the patient does not require an additional emergency response. However, all patients having an altered mental status, complaining of breathing problems or chest pain must have a paramedic assessment and transport to the hospital.

1. Rescue Only: First responding agencies (fire or police) may slow ALS or BLS ambulances when a patient does not require Advanced Life Support. They may cancel ALS or BLS ambulances when there is no patient or no transport required (Department policy to apply).
2. ALS ambulances or fire/rescues staffed at the paramedic level may slow or cancel other responders once the patient has been evaluated at the scene and the determination is made that no other units are required or no other units are required in the emergency mode.
3. Additional reasons for cancellation:
 - ✓ No patient found
 - ✓ Cancelled by dispatch
 - ✓ No emergency health care needed
